Trade Names:

610	Pythagoras
710	- AL23 - Alumina - Alsint

Standard TM-C probes are made with a ½" NB (21.34mm) support and a 15mm OD ceramic sheath. The supports are made from 316 stainless steel, other materials available on request. A 2 way ceramic terminal block is housed in a large alloy head.

*Platinum probes (Type S and Type R) are available in 0.35mm and 0.5mm wire. Please consult your nearest sales office for advice on the best choice. Platinum probe prices change daily with the market value of platinum and rhodium, be sure to ask for a current price.

Note: All ceramics are susceptible to thermal shock and should be preheated or gradually brought up to operating temperature.

All prices do NOT include GST. Prices are correct at time of print and are subject to change without notice.
