

Panel-mounted Thermostats, EM Series

with 1, 2, 3, or 4 single-pole snap-action switches

Special features

- Temperature controller TR and temperature monitor TW
- Safety temperature limiter STB
- Tested according to DIN EN 14597
- Pressure Equipment Directive 97/23/EC

Brief description

Thermostats control and monitor thermal processes. The devices of the EM series are available as temperature controllers TR, temperature monitors TW, temperature limiters TB, safety temperature monitors STW (STB), and safety temperature limiters STB. In the event of a malfunction, the STB switches the monitored machine to a safe operating status.

Panel-mounted thermostats operate according to the fluid expansion principle – a microswitch is used as an electrical switching element.

Switching function

Temperature controller TR and temperature monitor TW

If the temperature on the temperature probe exceeds the setpoint value, the microswitch is activated by the transmission mechanics and the electrical circuit is opened or closed. If the temperature falls below the selected setpoint (by the amount of the switching differential), the microswitch is reset to its initial position.

Restart lock for temperature limiter TB and safety temperature limiter STB

If the temperature on the temperature probe exceeds the set limit value, the electrical circuit is opened and the microswitch is mechanically locked.

The microswitch can be manually unlocked once the temperature has dropped by approx. 10 % of the scale range (approx. 15 % with a limit value setting > +350 °C).

For limit values exceeding 120 °C, the limit value set in the STB must be secured against incorrect adjustment (e.g. by a seal).

Self-monitoring for the safety temperature limiter STB and safety temperature monitor STW (STB)

If the measuring system is destroyed (i.e. if the expansion fluid leaks), the pressure in the diaphragm of the STB and STW (STB) drops and permanently opens the electrical circuit. Unlocking is then no longer possible.

When the probe has cooled down to a temperature below approx. -20 °C, the electrical circuit is also opened. However, it automatically closes again when the temperature rises above -10 °C.

Use of the safety temperature monitor STW as a safety temperature limiter STB

The circuitry used with the thermostat must comply with DIN EN 14597 and VDE 0631.

Temperature compensation (TK)

Any change in the temperature at the switching head from the 22 °C calibration ambient temperature will produce a deviation of the switching point. For ambient temperatures that fluctuate strongly, it is advisable to use thermostats with temperature compensation (extra code "TK").

The switching point deviation depends on the ambient temperature at the switching head and takes the switching differential into consideration.

The temperature influence on the capillary is not yet taken into account and can result in an additional error.

095	300 to 400
096	350 to 500
000	For limits with fixed settings

Order details:

Panel-mounted thermostats, EM series

Order code (4) Limit value with fixed settings

- 000 For adjustable control range/limit value range
 ... Specification in °C (must be only within the control ranges/limit value ranges)

(5) Switching differential

- | | | |
|----|---|--------------------------------------|
| 00 | Without switching differential (-40 STB, -50 STB) | |
| 10 | 1 %* of the scale range | |
| 25 | 2.5 %* of the scale range | with liquid-filled measuring systems |
| 50 | 5 %** of the scale range | |
| 70 | 7 %** of the scale range | |
| 30 | 3 %* of the scale range | |
| 50 | 5 %** of the scale range | with gas-filled measuring systems |
| 60 | 6 %* of the scale range | |
| 01 | 10 %* of the scale range | |
- * Only with TR + TW
 ** Only with TR, TW, and STW

(6) Capillary length

- 1000 1000 mm
 2000 2000 mm
 3000 3000 mm
 4000 4000 mm
 5000 5000 mm
 Special length, specification in mm
 (for the max. allowable length see "Technical data")

(7) Capillary material

- 40 Cu (Copper)
 20 CrNi (stainless steel)

(8) Process connection*

- 10 Plain cylindrical probe 
 20 Screw-in thermowell 

* For different types of connections and thermowells refer to data sheet 606710

(9) Thread of process connection

- 00 Without thread (process connection "10")
 13 External thread G 1/2

(10) Material of process connection

- 00 Only with process connection "10"
 46 CuZn (brass)
 20 CrNi (stainless steel 1.4571)

(11) Insertion length "S" (immersion tube length)

- 000 Without thermowell
 100 100 mm
 150 150 mm
 200 200 mm
 300 300 mm
 400 400 mm
 Special length, specification in mm (max. 500 mm)

Order details:

Panel-mounted thermostats, EM series

Order code (12) Diameter "D" (immersion tube diameter)

- 00 Without thermowells
- 8 8 mm
- 10 10 mm

(13) Diameter "d" (probe diameter)

- 6 6 mm
- 8 8 mm

(14) Extra codes*

- 000 Without extra codes
- 574 U Microswitch with N/C contact, restart lock, and additional signal contact (only for TB and STB)
- 702 au Snap-action switch contact, gold plated (only with 1-pole and 2-pole version)
- 699 X Screw connection up to 2.5 mm² conductor cross section
- 704 b1 Switching head mounting with 2 M4 screws, spaced 28 mm
- 705 b2 Switching head mounting with 2 M3 screws, spaced 33 mm
- 710 b7 Central mounting with acorn nut (only for TB and STB)
- 707 TK Temperature compensation (only with 1-pole and 2-pole version)

* State extra codes one after another, separated by commas

Sequence contact gap for 2-pole, 3-pole, and 4-pole devices

Specify in plain text (e.g. +2 °C, +5 °C, +8 °C)
