

Quick Start Guide - iMonnit Express 4.0 (PC Software)

1

Visit [Monnit.com](https://monnit.com) to download and install the [iMonnit Express](https://monnit.com) software. Launch the iMonnit Express installer and follow the on-screen instructions.

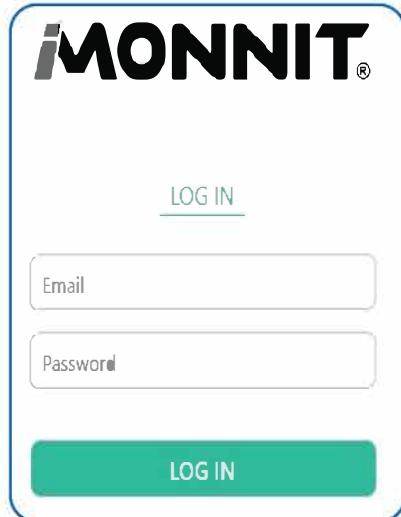

2

Restart your computer.* Launch the iMonnit Express program from your desktop. The program will open in a browser window.

* If you prefer not to reboot your computer, you can locate the service "iMonnit Express" inside your service manager console and start the service manually.

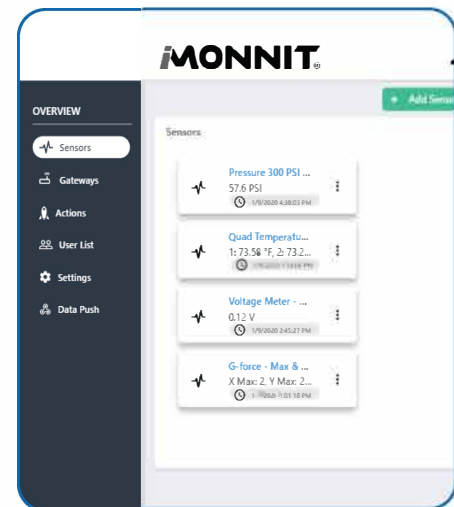

3

Activate the Express software with the code you received when purchasing. Create a username using your email address and a unique password. Re-enter the combination to log into iMonnit Express.

For more detailed instructions, documentation, how-to guides and video demonstrations on using Monnit wireless sensors, wireless gateways and iMonnit software, visit our support page at monnit.com/support/.

4

Add sensors and gateways to your iMonnit Express account and adjust their settings.
